

**Susan G. Komen  
Research Grants – Fiscal Year 2014**

This research grant was approved by Komen's national board of directors for FY2014 Research Programs funding. This grant will be funded upon the execution of grant agreements between Komen and the grantee institutions.

**IMPAKT 2014**

**Investigator(s):** Nikolaj Tomma

**Lead Organization:** European Society for Medical Oncology

**Grant Mechanism:** SPP

**Grant ID:** SPP140011

---

**Public Abstract:**

This grant supports travel scholarships for young investigators to attend the 6th IMPAKT Breast Cancer Conference in Brussels, Belgium on May 8-10, 2014. IMPAKT focuses specifically on translational research and new drug development, in an era where there is potential to provide tailored treatment to biologically homogeneous groups of patients with breast cancer. IMPAKT provides the ideal environment to foster a dialogue between laboratory and clinical scientists as well as representatives of the pharmaceutical industry and for physicians to possess the knowledge and skills to use new technologies and integrate translational research components into clinical trials.
